DEVELON's New Generation 9 Series Delivered for the First Time

HD Hyundai Infracore has officially delivered its new generation 9 series excavator to its first customer after the global launch.

On May 19 (Mon), HD Hyundai Infracore held a customer handover ceremony for the first unit of the 24t DX240, one of its new generation excavators, at its headquarters in Incheon.

The ceremony was attended by CEO Seunghyun Oh, Head of Construction Equipment Division, Jaeyoung Moon from HD Hyundai Infracore, and representatives from the Korea Construction Equipment Manufactures Association. They celebrated the delivery of the first unit of the new generation model and presented commemorative plaques and gold business cards to the first customers, Yongcheol Lee, CEO of Cheongrim Environment and Uibyeong Hwang, CEO of Hana General Machinery.

HD Hyundai Infracore will offer promotional discounts and after-sales service programs as a token of appreciation to the first customers.

The first customers praised not only the revamped interior and exterior design of the new generation model, but also the enhanced ease of operation through personal customization and the improved operational safety based on the latest smart technologies. They expressed their gratitude for the delivery of equipment with such high-quality standards.

Immediately after the delivery, HD Hyundai Infracore hosted a new generation model experience event, inviting over 20 key customers from the Seoul metropolitan area and Jeollabuk-province, as well as representatives from domestic sales subsidiaries.

CEO Seunghyun Oh stated, "Following the launch of our new generation model at the 2025 Seoul Mobility Show, we have now delivered the first unit to our customer." He added, "As interest and inquiries about the new model continue to grow overseas, we will do our utmost to expand sales and enhance brand recognition in the global market."
